

Music Together®

What Is Music Together®?

Music Together® is an early childhood music and movement program for children from birth through age eight—and the grownups who love them!® We're on a mission to make the world a better place by making it more musical™. We do this by providing the highest-quality music and movement classes to families everywhere. First offered in 1987, our classes help little ones develop their innate musicality and much, much more.

The Leader in Early Childhood Music Education

Our curricula has decades of research behind it, in both music education and child development. As the first organization to hold music classes for the youngest learners, and the first to include parents, we have been pioneers in early childhood music education since day one. And because we recognize that children learn through play, we make everything we do in class engaging and enjoyable for everyone.

Music Learning Supports All Learning®

In our research-based classes, children naturally learn how to sing in tune and keep a beat. Learning music also supports overall development—something we call Music Learning Supports All Learning®. Active music-making creates unique connections in the brain that support children's language, social, emotional, cognitive, and physical development.

We're Worldwide

Our classes can be found in more than 3,000 communities in 40+ countries. To help us reach as many families as possible, Music Together is taught at licensed locations by teachers who have completed our comprehensive Teacher Training Workshop. No matter where they live, or how they participate, all Music Together families sing and dance to the same award-winning music and get the same high-quality family experience.

Award-Winning Music

Music Together songs were designed to inspire families to listen, sing, and make music together both at home and on the road. Each of our nine core song collections is a mix of original and traditional songs from a variety of genres and styles (folk, blues, rock, jazz, classical, and more), in a wide variety of tonalities and meters.

Family Classes for Children throughout Early Childhood

Music supports children's development at every age and stage of early childhood, so we offer a range of class types for children from birth through age eight. All classes are designed to teach the way children learn: through play.

- **Mixed-Age Classes:** The signature Music Together class for children five and under and their parents and caregivers. The whole family can get in on the musical fun, including grands!
- **Babies Classes:** A special class for parents with babies under nine months old. Participants learn interactive music activities that support their infant's development and meet other new parents.
- **Rhythm Kids® Classes:** Active, high-energy music, movement, and drumming classes for children ages 4-8.

"Thanks for giving our very musical family the environment to have so much fun and to laugh so much."

— Grace T., Hayward, CA

Music Curricula and Resources for Early Learning Settings

From private and public preschools, to childcare centers and in-home daycares, Music Together in-school programs have been found to raise the overall quality of children's early learning. We offer two options for early learning settings.

- **Music Together® In School:** A fully integrated, comprehensive music curriculum, designed to be taught by a music specialist who has passed our online training.
- **Play Along by Music Together®:** An innovative music enrichment resource, designed to be delivered by the classroom teacher without further training.

Music Together® in Therapeutic Settings

Music Together Within Therapy® is a licensed application of Music Together that credentialed allied health professionals can use to support the treatment of individuals or small groups. Clinical settings have included, among others, private homes, children's hospitals, schools for children with disabilities, speech therapy clinics, and music therapy practices.
